

All India Insights Dashboard using Power BI

Objective

Analyze India village-level data and API-based user-post data to generate meaningful insights using Power BI dashboards.

Data Sources

- Village Dataset (State, District, Sub-district, Village)
- API JSON Data (User ID, ID, Title, Body)

Tools & Technologies

- Power BI
- DAX
- Excel/CSV

Dashboard Overview

Home Page: Overall KPIs and navigation

Village Analysis: Geographic insights

API Dashboard: User-post analysis

Summary Page: Key insights

Key KPIs

Total Posts, Total Users, Unique Users, Average Posts per User, Top 5 Active Users

Key Insights

- Few users contribute most posts
- User activity varies significantly
- Village data shows regional distribution

Conclusion

This project demonstrates Power BI skills in data cleaning, visualization, and storytelling.
