

CAPSTONE PROJECT FINAL REPORT

Prepared By: A SAURA HASUM FATHIMA

Project Overview

This project focuses on building a complete data pipeline and interactive Power BI dashboard using India's MDDS dataset with API integration.

Project Features

- Data Cleaning and Transformation
- Database Integration
- API Integration using JSONPlaceholder APIs
- KPI Cards and Drill-down Analysis
- Interactive Power BI Dashboard
- Village Level Insights and Visualization

API DETAILS

Base URL:

<https://jsonplaceholder.typicode.com/>

Endpoints Used:

1. GET /users → Returns list of users
2. GET /posts → Returns list of posts

Purpose:

Used for API integration and dashboard visualization in Power BI.

Dashboard Pages Included

- Home Page
- Summary Page
- Village Analysis
- Tooltip Page
- API Dashboard

Conclusion

This capstone project demonstrates practical implementation of data transformation, API integration, visualization, and reporting using Power BI.
